

Musical Paradise MP-401 MK3 Quick Setup Manual

Tube Setup Guide

MP-401 MK3 supports EL34, 6L6GC, KT88, 6550 and KT120 power tubes, 6SN7, 6N8P preamp tubes, and 6N7, 6N7P driver tubes. Since MP-401 MK3 is auto biasing design, users can change these tubes without any adjustment. Matched pairs of tubes are recommended. All power tubes are placed at the back row. 6SN7 preamp tubes are placed at the center front row. 6N7 driver tubes are placed at the outer front row. These need to be double checked and confirmed before turning on.

Warning

High voltage inside. Always unplug power cord before servicing inside.
